

IOT POWERED UPS MONITORING

- Real-time UPS monitoring with built-in intelligence, actionable analytics and AI-driven recommendations.
- Easy plug & play setup
- Fully managed white labeled Solution

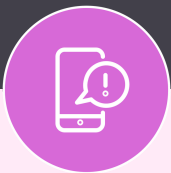

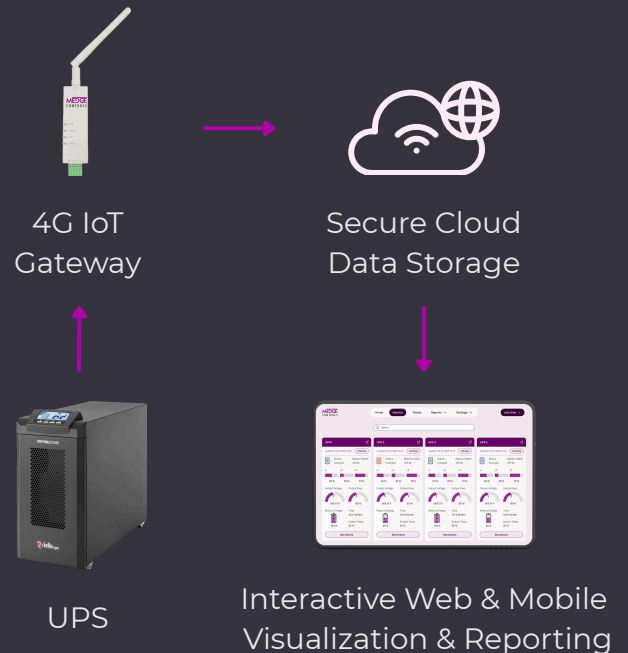

REAL-TIME UPS & POWER MONITORING

- UPS Parameters: Input & output voltage, load percentage, state of charge, battery health, remaining backup time, battery voltage & current, charging/discharging status, UPS operating mode, and alarms.

SCALABLE & PLUG-AND-PLAY INTEGRATION

- Supports multiple UPS makes and models with pre-mapped Modbus configurations.
- Select UPS → Enter Gateway SN → Start Monitoring

CONCEPT

Smart Alerts

Instant notifications via WhatsApp & Email for critical events like Power failure, Low backup time & Battery faults

Customized Dashboards

Dashboards and reports customized to your infrastructure.

Battery Health

Continuous monitoring, detects degradation and prevents failures.

Performance Analysis

AI learns patterns to predict issues and recommend actions.

01

Seamless integration with SAP and ERP systems

02

Scalable architecture for single-plant and multi-plant monitoring

03

Easy report export to Excel and PDF formats

04

AI Chatbots with Whatsapp integration - MIRA AI
